

1. There are 5 kittens. 2 of the kittens leave to chase a mouse. 3 leave to take a nap. 1 wakes up and comes back. 1 kitten stops chasing the mouse and returns. How many kittens are at the starting point?

2. The black cat wakes up at 7 am for food. It takes her 10 minutes to finish the food and water. She stalks some birds for 70 minutes, before going back to sleep. When did she go back to sleep?

Answer sheet:

1: There are 2 kittens at the starting point.

2. The cat goes back to sleep at 8:20 AM.
